DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 1, the preamble is unclear in that it is not clear that the “rotating shaft” and the “radial press device” are separate elements.

In claim 1, line 8, “a gradually reduced inner radius” is not fully understood in the context of the claim.

In claim 1, the phrase “and when the milled face touches a free end... in a state of automatically locking” is generally unclear and not fully understood in the context of the claimed invention.

In claim 2, it is not clear exactly what is meant by “the friction part is flat”. In exactly what way is it flat? How can it be both in the shape of a cylinder and be flat?

In claim 6, “may have” makes it unclear if this condition actually exist. Further, it is unclear how this condition would be able to exist, since the rod must be inserted into the friction part.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 3-6, as best understood, are rejected under 35 U.S.C. 102(e) as being anticipated by Lu, US Patent 6,230,365. All the limitations of these claims are provided, including a cylindrical rod 150 with milled face 151, a friction part 16 having circular sections and arched section (with gradually reduced radius), and the device operates as claimed. Fitting part 18 is essentially T-shaped.

Allowable Subject Matter

4. Claim 2 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark A. Williams whose telephone number is (703) 305-3438. The examiner can normally be reached on Monday through Friday.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 306-1113.
